 **JOHNS HOPKINS**
APPLIED PHYSICS LABORATORY

About us

- Hosted at the sprawling Johns Hopkins Applied Physics Lab Campus in Laurel, MD
- Access to a huge community of space and tech enthusiasts in the Baltimore-Washington metro area
- Access to APL engineers with real-world experience in Space
- Live streaming of project demonstrations
- Challenge SWAG bags offered to all participants and tours of APL
- A passel of resources provided by challenge supporters such as 3D printers and VR set will be made available to participants
- Established relations with local high schools, universities, museums and private companies from hosting the event in 2015 & 2016

Citizens Science

- Space Apps is a NASA program to spur innovation
- Real life problems posed by NASA
- Finalists are highlighted on openNASA website
- Brings together people from programmers and engineers, to students, artists and makers
- Great opportunity to get kids interested in STEM
- Allows regular people to make real contribution to science, engineering, and space exploration

Bridging the gap between scientific crowdfunding and philanthropy

What is the Science Partnership Fund?

The mission of the Science Partnership Fund is to facilitate foundation and corporate support for crowdfunding projects in physics and related areas. We recognize that today's potentially revolutionary scientific endeavors do not always lend themselves to traditional grant-based funding, and many promising technical innovations are not yet ripe for venture capital investment. Crowdfunding fills this funding gap and allows the public to participate in the scientific and entrepreneurial process.

Sponsorship Levels

	Bronze	Silver	Gold
Amount	\$500	\$1000	\$2000
Materials in swag bag	*	*	*
Logo on website	*	*	*
Logo on promo materials		*	*
Mention on social media		*	*
Presence at event			*

Thank You!

We encourage all partners and collaborators to attend the event, and offer floor space for those interested in interacting with participants, volunteers and observers

Please feel free to contact us and let us know what we can do for you!
